

Room Setups

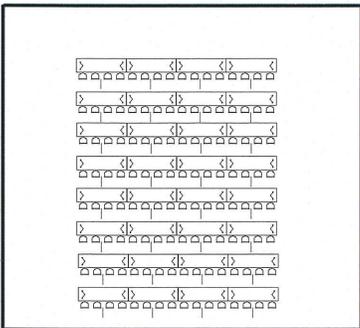

BANQUET STYLE SEATING

Typical preference to banquet style seating is all around tables. The room/space being used for the banquets may require that a combination of rounds and longs be used to permit maximum comfort. Rounds are used square footage. When combining longs and rounds a focus upon using longs on distant walls and rounds in the center of the room will be used.

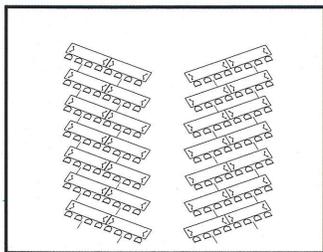

HALF MOON ROUND STYLE

For functions requiring focus upon presentations area and participant interaction. Alternative to classroom. Also a desirable set up for "working lunches" or to compensate for lack of separate rooms for food service.

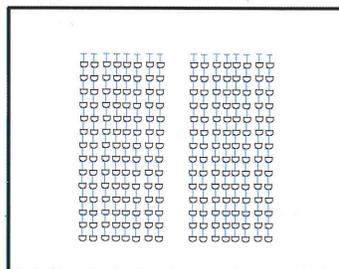

CLASS ROOM STYLE

Focused upon presentation area for training and note taking. Not conducive for attendee interaction.

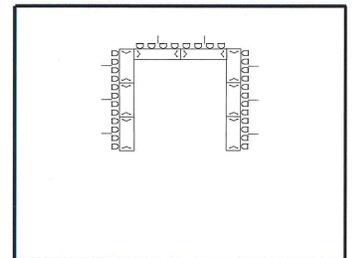

CHEVRON STYLE

A variation of classroom

THEATRE STYLE

U SHAPE

For smaller meetings requiring full participant interaction.
